Projects

Qualm

Crowdsourced fashion app for Android for help with clothing purchases.

Key Technologies: Android Studio, Java, PostgreSQL, Node.js, Express, Heroku.

.Gifs Against Humanity

A multiplayer web game similar to Cards Against Humanity. Players submit .gifs to answer queries. A rotating "selector" player chooses the funniest .gif answer.

Key Technologies: Websockets, Node.js, Express, JQuery.

Bucketlist

A collaborative web app designed for users to compare their own personal "bucketlist" with other users'. Implements fuzzy search for bucketlist goals, yielding all bucketlists with that goal.

Key Technologies: Express, Sass, PostgreSQL, Heroku.

Education

Galvanize

Denver, CO
Full Stack Immersive

University of Miami

Miami, FL
BA Music and Anthropology

Employment

Super Awesome Pedicabs

Owner

I owned this pedicab company for five years, operating in downtown Denver. At its peak I managed two employees.
